

Role of the School Council Treasurer video script

Welcome to the Role of the School Council Treasurer.

This training session is part of the Kawartha Pine Ridge District School Board's commitment to communication with and professional development for school councils.

School councils play an important role in the Education System, namely to provide support and feedback to principals and school boards to improve student success.

The Treasurer has the responsibility to accurately report revenue and expenditures to council on a regular basis.

In addition, the Treasurer is expected to act in accordance with the Guidelines for School Generated Funds, which are available at each school. If you haven't yet reviewed this document, ask your school principal for a copy.

We will go over the Treasurer's role to clarify the responsibilities and hopefully make your job a little easier.

The Treasurer's Report should be a standing item on each school council meeting agenda.

The report should include sources and uses of funds and the current financial position of the council.

The specifics are outlined in the Guidelines for School Generated Funds document

The monthly report should include:

- A Treasurer's Report containing:
- Opening Balance in records (should equal last month's closing balance)
- Year to date total deposits and payments
- Closing Balance in records (will be the following month's Opening Balance)

Keep your verbal report brief and only go over highlights that will be of interest to council members.

The school council Secretary will note in the minutes that the Treasurer's report has been received and approved.

The Treasurer doesn't approve expenditures, but does facilitate payments.

School Council regulations require that financial transactions and minutes be kept at the school for 7 years and any person may examine them without charge.

Now, let's work backwards and see the steps that led up to the council meeting.

Two individuals always count money to double-check each other's math j
